100HOMES™

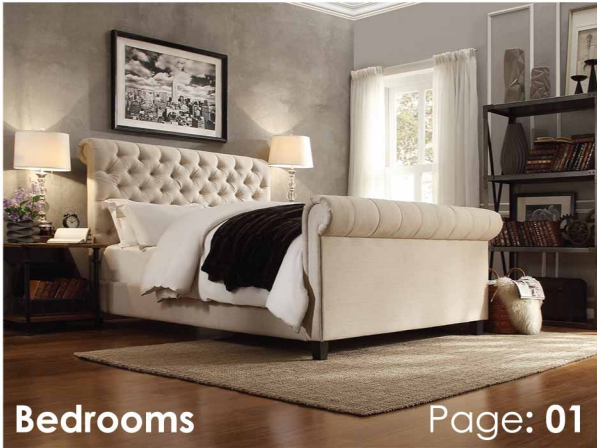

*"Keeping up the
art of good living"*

100 homes philosophy aims at creating dynamic spaces in harmony with our interior lives. Settings that tell a story, that expresses a personality and a way of understanding domestic environments and more. These settings emerge from our study of contemporary world and a desire to interpret the concrete needs of society today, with a healthy dose of poetry and irony. They are ideas and solutions for personalising your spaces and making them into places of constant inspiration, creating emotional, highly liveable settings always characterised by a 'home feeling'

Our team of designers and craftsman constantly try to establish an interior resonance between you and your surroundings. Right from understanding your taste, synchronizing it with the latest technical knowhow and delivering the goods in the most desirable materials and finishes forms the principal approach of 100 homes.

“We plan the solid to breathe life into the void”
